GOING LIVE 31 AUGUST

Braino

A companion for everyone.

A co-founder for founders.

Building is no longer the hard part.

Anyone can ship a product in a weekend. Then nobody hears about it.

- **Writes and posts about it every week**, in your voice, on Reddit and LinkedIn
- **Gets you named** when your buyers ask ChatGPT
- **Finds the right people** and writes to each one personally

Nothing goes out until you tap approve.

Itish Pande · Mesa School of Business · August 2026 · trybraino.com

The problem

You ship it. Nobody hears about it.

1 in 3

new companies in 2026 has one founder. AI made building cheap and fast.

~1,500

visits from a top-5 Product Hunt launch today. It used to be 15,000.

10 hrs/wk

posting, messaging, scrolling Reddit. For a handful of real conversations.

#1

founder complaint online is not AI and not features. It is distribution.

AND THE PROBLEM IS GROWING, NOT SHRINKING

Solo businesses are growing 2.7% a year against 1.1% for companies that hire. India added a record 55,200 startups last year.

More founders every month, all facing the same wall: build for months, launch, hear nothing. Five signups, three are family.

Sources: US Census non-employer establishments · DPIIT · Solo Founder Playbook 2026 · FundnAI · Before Takeoff · r/buildinpublic

We asked 8 founders. Here is what they said.

Nobody pays for this. Everybody needs it.

CAREKIN

"Distribution is my biggest bottleneck. I would actually buy this."

Learned these tools existed during our interview. **Ready at ₹2,000/mo.**

LAZYTYPER

"Scripts are the headache. Making videos is easy. Knowing what to say isn't."

Built his own bot rather than pay for a tool. **Says a normal founder pays $100+.**

8 / 8	0 / 8	3	₹1.5–3K
say distribution is the biggest unsolved problem	pay for a single distribution tool today	said "I would buy this" on the spot	a month is the India band they named

Their three options today, and why each one fails

Do it all themselves

10 hrs a week. Eats the time they needed for building.

Build their own hacks

Scripts and bots that break. A patch, not a system.

Hire experts

$700–1,000/hr. Only funded companies can afford it.

How big is the opportunity?

Start with everyone. Filter down to who we can actually sell to.

TAM

$17.9B

- **29.8M one-person businesses** in the US alone
- **$600 a year** each. One $50/mo tool
- SMBs already pay **$200–500/mo** for marketing software

US Census · WebFX martech benchmark

FILTER 1

Builds and sells online.
73% already use AI.

→

SAM

$1.3B

- **2.2M founders** who build with AI
- English-speaking markets **+ Indian metros**
- **240,000 DPIIT startups** already sit there

Solopreneur AI adoption · DPIIT

FILTER 2

Our slice by year three.
3% of SAM.

→

SOM

$39M

- **65,000 paying founders**
- **₹1,500–3,000** in India, **$49–99** globally
- Reached via Mesa, agencies, the free companion

Year three target

THE WALLET EXISTS. IT IS JUST NOT BEING SPENT ON THIS.

66% of small business owners spend under $1,000 a year on marketing, and 0 of our 8 founders pay for a distribution tool at all.

We are not asking anyone to switch. We are the first thing they buy.

Who is our customer?

The founder who built it. And nobody saw it.

MAIN CUSTOMER

The Solo Builder

- Ships fast with AI. Then hits the wall: **nobody sees it**
- Pays for **zero** marketing tools today
- Biggest pain is **content**: what to write, what to post
- Wants AI to draft everything, but **approves before it goes public**
- Pays **₹1,500–3,000/mo**. Wants one app, not five

SECOND CUSTOMER

The Marketing-Savvy Founder

- Knows marketing. **Drowning in the daily work of it**
- Says AI outreach saves **40–50% of his effort**
- Already sees buyers asking ChatGPT before Google
- Pays **$200+/mo**, against consultants at $700–1,000/hr

Why they are right: the pain repeats every single week, three already said they would buy, and we reach them for free through Mesa, Hyderabad and the free companion.

What is Braino?

One co-founder. He runs your distribution.

- **You talk. He works. You approve. The world sees you.**
- Writes and posts in **your** voice, every week
- Keeps you **named when buyers ask an AI**
- Finds the right people and **drafts every message**
- **Nothing goes public without your tap.**

FREE · EVERYONE

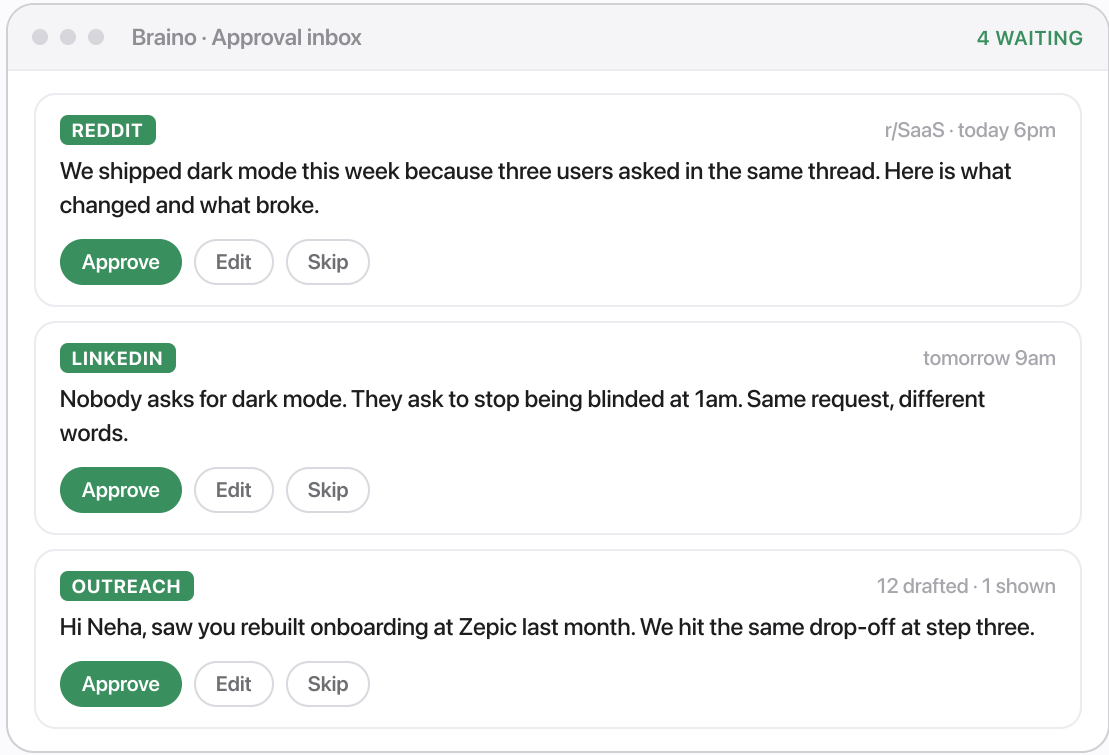

Braino Companion

Reads your pages, records your meetings, learns how you write. **Live today.**

PAID · FOUNDERS

Braino Foundry

The same companion, now running your distribution. **31 August.**

Inside Braino · deep dive

Three engines. One week of work, done for you.

Engine 1 · running today

Content

- Writes in **your** voice, from what you shipped
- Reddit, LinkedIn, X, Instagram
- Every week, no blank page

7 of 8 founders called this pain #1

Engine 2 · 31 August

Optics

- Asks ChatGPT what your buyers ask
- Checks **whether it names you**
- Ships the fix, weekly

8 of 8 wanted it once explained

Engine 3 · Q4

Outreach

- You say who. He finds them
- **One message per person**, not a blast
- Tracks replies, follows up

Saves 40–50% of the effort · GTM expert

Content · one update, five places — ENGINE 1

Reddit | LinkedIn | X | Instagram

Shipped dark mode after three people asked in the same thread. The hard part was not the colours — it was every chart and badge we had hard-coded.

Learned from 200 of your own posts · long for Reddit, short for X

Optics · this week's check — ENGINE 2

"Best expense tracker for freelancers?" · asked weekly

ChatGPT	Names 4 tools. Not you.	INVISIBLE
Perplexity	Cites your Reddit answer.	NAMED
Google AIO	Competitor's pricing page wins.	INVISIBLE

Fix drafted: a comparison page + 2 Reddit answers → sent to Content

Why it wins

Two things to remember.

THE RULE ABOVE ALL

Nothing goes public without your approval.

Every draft lands in one inbox. You tap yes, edit, or skip. **All 8 founders demanded this before they asked for a single feature.**

WHY IT IS 10X BETTER

Five tools plus ten hours a week. Or one co-founder.

Today a founder pays for five tools, gives up ten hours of their own week, and still stays invisible. **Braino does the whole job for less than any one of those tools.**

How we make money

Free companion. Paid co-founder.

FREE TO BEGIN WITH

Braino Companion

₹0

- Everyone with a screen
- **Capped by usage**

SUBSCRIPTION

Braino Foundry

₹1,500–3,000

- Per month, in India
- **$49–99** globally
- **$200+** revenue stage

DONE FOR YOU

We run it ourselves

₹25–50K

- Per month, after a free first month
- Highest margin, fastest learning
- **Whatever repeats becomes a feature**

WHERE WE ARE TODAY

1
service client signed — Dinebees, 10K downloads

3
founders in closing at their stated price

25
founder conversations banked

120
Mesa founders to sell into next

Free users become founders, founders become Foundry customers, and their results bring the next ones. **Braino markets Braino.**

How we reach them

Three ways in. All three are already open.

Pillar 1

Outbound

- Founders posting the problem in public, right now
- Reddit, LinkedIn, X, in their own words
- **We run Braino's outreach on Braino**

Our own engine is the first case study

Pillar 2

Mesa

- **120 founders** in the same building
- Plus 50 in Hyderabad, inside a 700-strong ecosystem
- Warm, free, and already asking

1 signed, 3 in closing from here

Pillar 3

Agency partnerships

- Content, personal-branding and ads agencies
- They have the founders. We have the engine
- **They resell, we power it**

One distribution deal reaches dozens of founders

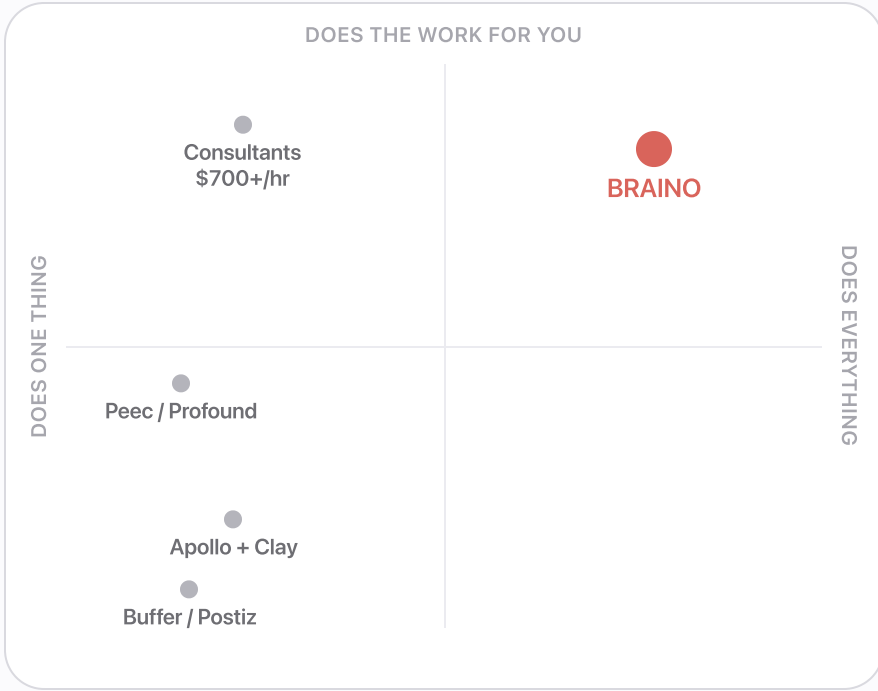

Why this works: 0 of 8 founders pay for a tool today, so we sell the result and not the software. "We will get your product in front of buyers" is the pitch.

Every task we repeat for three clients becomes a Braino feature, which makes the service paid research.

Competition

Every tool does one piece. You do the rest.

WHAT IT DOES	PRICE	WHAT IT LEAVES YOU
Posts for you Buffer · Postiz	$15–49/mo	You still write every word.
Finds people for you Apollo · Clay	$50–100/mo	You still write every message.
Measures AI visibility Peec · Profound	$99–399/mo	Tells you that you are invisible. Does not fix it.
Does all of it GTM consultants	$700–1,000/hr	Only funded companies can afford it.
BRAINO Writes, posts, gets you named, reaches out	₹1.5K–$200/mo	**One tap. That is the whole job.**

The only thing on the market that does the whole job is a human at $700 an hour. **Everything a founder can afford makes them do the work themselves.**

Projections · quarter on quarter

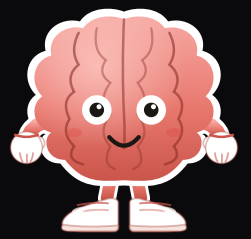

What ships, and who is paying by then.

	Q3 2026	Q4 2026	Q1 2027	Q2 2027
Product	**Content + Optics live** Approval inbox ships with v1. Launch 31 August.	**Outreach** Personal drafts at scale, gated. One dashboard across all three.	**Braino Code** The co-founder starts building the product too, not just distributing it.	**End to end** Idea to shipped to seen, one memory across all of it.
Companion	2,000 free users	10,000 free users	30,000 free users	75,000 free users
Foundry	10 paying	60 paying	200 paying	500 paying
Service	3 clients	6 clients	10 clients	15 clients
Revenue	₹1L MRR	₹4L MRR	$15K MRR	$40K MRR

The free companion feeds Foundry, and the done-for-you service tells us what to build next. **Braino Code lands in Q1 2027, once distribution is working.**

GOING LIVE 31 AUGUST

Let's make distribution the easy part.

(he is adorable, we know)

A companion for everyone. A co-founder for founders.

Speak and watch it happen.
