Braino

Making distribution as easy as vibe coding.

A companion for everyone. A co-founder for founders.

Itish Pande · Mesa School of Business · August 2026 · trybraino.com

Every founder needs a co-founder

Solo founders can build. They cannot get seen.

A co-founder splits the work. One in three new companies has nobody to split it with, and the half nobody covers is distribution.

Nothing to say

Posting every week, in public, while still building the product.

Nobody knows you

A top-5 Product Hunt launch brings 1,500 visits today. It used to bring 15,000.

Nobody to talk to

Finding the right buyers, then writing to each one by hand.

WHAT IT COSTS THEM TODAY

10 hours a week on posting, messaging and scrolling, for a handful of real conversations.

1 in 3 new companies in 2026 has a single founder, and solo businesses are growing 2.7% a year against 1.1% for companies that hire.
More founders every month, same wall.

Sources: US Census non-employer establishments · DPIIT · Solo Founder Playbook 2026 · r/buildinpublic

So we asked eight of them

What eight founders told us.

CAREKIN

"Distribution is my biggest bottleneck. I would actually buy this."

Learned these tools existed during our interview. **Ready at $21 a month.**

LAZYTYPER

"Scripts are the headache. Making videos is easy. Knowing what to say isn't."

Built his own bot rather than pay for a tool. **Says a normal founder pays $100+.**

8 / 8
say distribution is the biggest unsolved problem

0 / 8
pay for a single distribution tool today

3
said "I would buy this" on the spot

$16–32
a month is the India band they named

Their three options today, and why each one fails

Do it all themselves

10 hrs a week. Eats the time they needed for building.

Build their own hacks

Scripts and bots that break. A patch, not a system.

Hire experts

$700–1,000/hr. Only funded companies can afford it.

So we built one

One co-founder. He runs your distribution.

One co-founder who does the whole job, for less than any single tool they already pay for.

WHAT BRAINO DOES FOR YOU

- Publishes in your voice, every week
- Gets you named when buyers ask an AI
- Finds the right people and writes to each one
- Keeps your reviews and listings working for you
- Nothing goes out until you approve it

FREE · EVERYONE

Braino Companion

Reads your pages, records your meetings, learns how you write. **Our acquisition channel, at zero CAC.**

PAID · FOUNDERS

Braino Foundry

The same companion, now running your distribution.

What he does all week

Three jobs. One week of your work, done for you.

Content

You show up every week without writing a word

- **5 posts a week**, drafted from what you actually shipped
- One update, **fitted to every platform** you care about
- Helpful posts get **10x more replies** than sales posts

LinkedIn · X · Reddit · Instagram

Optics

Buyers find you when they ask an AI

- **37% of discovery** now starts in an AI answer, not Google
- Right now the AI names your competitor. **We get it to name you**
- **If you are not named, we fix it** — reviews, listings and pages

ChatGPT · Perplexity · Claude · G2 · Capterra · Google Reviews

Outreach

Conversations booked, not messages sent

- **20 hyper-personalised messages a week**, one per person
- Cuts **40–50% of the outreach effort**, per a growth expert
- Replies tracked and followed up, **nothing dropped**

LinkedIn · zoominfo · Email

Human in the loop — nothing goes public without your approval.

How many founders are there

The market, in three numbers.

TAM

$17.9B

- **29.8M one-person businesses** in the US alone
- **$600 a year** each. One $50/mo tool
- SMBs already pay **$200–500/mo** for marketing software

US Census · WebFX martech benchmark

SAM

$1.3B

- **2.2M founders** who build with AI
- English-speaking markets **+ Indian metros**
- **240,000 DPIIT startups** already sit there

Solopreneur AI adoption · DPIIT

SOM

$39M

- **65,000 paying founders**
- **$18–99 a month**, depending on market
- Reached via Mesa, agencies, the free companion

Year three target

THE WALLET EXISTS. IT IS JUST NOT BEING SPENT ON THIS.

66% of small business owners spend under $1,000 a year on marketing, and 0 of our 8 founders pay for a distribution tool at all.

We are not asking anyone to switch. We are the first thing they buy.

What they pay

Free to start. Paid when it works for you.

BRAINO COMPANION

Two tiers

Freemium
Capped by usage

PRO
$15/MO
No limit

BRAINO FOUNDRY

The co-founder

$16–99

- **$16–32** a month in India
- **$49–99** globally
- Founders already making money pay **up to $200**

DONE FOR YOU

We run it ourselves

$260–525

- Per month, after a free first month
- Our best margin, and it shows us what to build
- **Anything we do twice by hand, we build**

WHERE WE ARE TODAY

1	3	25	120
service client signed — Dinebees, 10K downloads	founders ready to pay	founders we have interviewed	Mesa founders we can reach next

The free tier does two jobs. **It brings us the founders who later pay**, and every free session shows us what to fix, **so the product gets better the more it is used.**

Where we find them

Three ways in. All three are already open.

We start narrow: solo founders shipping with AI in Indian metros, pre-revenue to $2K MRR, who already post about what they build.

The first 10

People who already know us

- **120 founders** in the same building
- Plus **50 in Hyderabad**, inside a 700-founder community
- They already know us, and **they are already asking**

1 signed, 3 close to buying from here

The first 100

We find them in public

- Founders complain about this **in public, every day**
- **r/buildinpublic, r/SaaS, Indie Hackers, Peerlist, WIP, Show HN**
- We reply with **something useful, not a pitch**

We use Braino to sell Braino

The first 500

Agencies bring us founders

- Content and branding agencies **already have the founders**
- They sell retainers they **cannot staff**. We are the capacity
- **They keep a cut. We keep the customer**

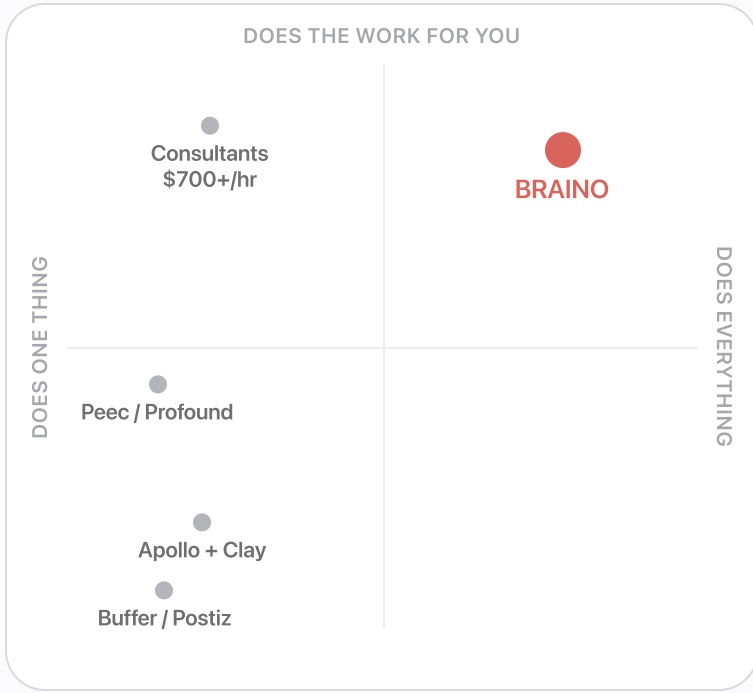

One agency deal reaches dozens of founders

In India we meet them where they already gather: **Headstart, TiE and Nasscom 10K**. And the free companion does the selling: it learns your voice, then shows you a week of posts you did not ask for. **The upgrade is approving them.**

Why not just buy five tools

Every tool does one piece. You do the rest.

WHAT IT DOES	PRICE	WHAT IT LEAVES YOU
Posts for you Buffer · Postiz	$15–49/mo	You still write every word.
Finds people for you Apollo · Clay	$50–100/mo	You still write every message.
Measures AI visibility Peec · Profound	$99–399/mo	Tells you that you are invisible. Does not fix it.
Does all of it Growth consultants	$700–1,000/hr	Only funded companies can afford it.
BRAINO Writes, posts, gets you named, reaches out	$16–200/mo	**One tap. That is the whole job.**

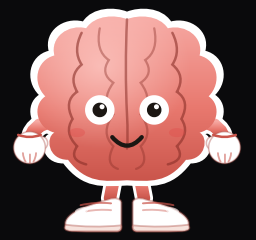

Why this is 10x better: five tools and ten hours of your own week, or one co-founder who already knows your company. **Braino does the whole job for less than any single tool on this list.**

COMPANION GOING LIVE 31ST AUGUST

Speak.
Watch it happen.

One co-founder who runs your distribution, for less than any single tool you already pay for.

Going live 31st August.

(he is adorable, we know)
