CREATISH INC.

BRAINO FOUNDRY

Your AI co-founder.

Speak. Watch it happen.

trybraino.com

THE PROBLEM · 1 OF 2

Building is easy now.
Anyone can build.

AI writes the code. Tools ship the product. What took a team and a year now takes one person and a weekend. Building is no longer where startups die.

THE PROBLEM · 2 OF 2

Getting seen is the whole game.

You could build the best product in the world — if nobody looks at it, it doesn't exist. Distribution is why average products outsell great ones. Content distribution got cracked. Founder distribution never did.

WHO HURTS MOST

The solo founder.

One person, every job: build the product, design it, ship it, market it, post on five platforms, find leads, reply to everyone — alone. Marketing becomes a second full-time job nobody signed up for.

BUILD DESIGN SHIP MARKET POST SELL REPLY

...all of it, one pair of hands.

THE SOLUTION

One co-founder. Two engines.

BRAINO CODE

You have an idea. He builds it.

DISTRA

You built it. He gets it seen.

ENGINE 1

BRAINO CODE

A coding agent you talk to. Not one AI — all of them.

- Voice-first. You speak, he codes.
- Multi-LLM reasoning — the best model for each job, picked automatically.
- Zero prompts. You never open a code editor. You never write a prompt.
- Powered by agent SDKs under the hood. You only ever meet Braino.

HOW IT FEELS

“Braino, I don't like the color. Make it red.”

Done. Refresh and look.

“Now add payments. And explain what a webhook is.”

Building it. Webhook = the app calling you back...

He doesn't just build. He teaches you the business as he goes.

Tools, design, money — explained so simply a five-year-old could ship a website.

ENGINE 2

DISTRA

Your product exists. Now the world finds out.

- Runs your distribution end to end — every platform, one voice.
- Finds leads on Reddit. Automates your edits. Posts for you.
- Guides every move: what to say, where to say it, when.
- Marketing stops being your second job.

EVERYWHERE THAT MATTERS

LINKEDIN
X
INSTAGRAM
REDDIT
PRODUCT HUNT

One founder can't be everywhere every day. Braino can — posting, engaging, finding the people who need what you built.

Handled. End to end.

WHY US, WHY NOW

The machinery already exists.

- Voice layer — built. Braino already talks and listens.
- Agent + screen control — built. He already acts, not just answers.
- Personality & memory — built. An Emotional Engine, not a chatbot.
- This isn't a pivot. It's pointing everything at the right people.

MONEY

Pay for what you use. Nothing else.

FREE

Start building today. No card, no wall.

CREDITS

Usage-based. Tokens in, work out.

UPGRADE

Need more? Buy more. That's the model.

Running a startup becomes

as easy as thinking about it.

Speak. Watch it happen.
