BRAINO

Building is no longer the hard part.

Anyone can build a product in a weekend. Almost nobody gets seen.

A companion for everyone. A co-founder for founders.

Itish Pande · Mesa School of Business · Aug 2026 · trybraino.com

THE PROBLEM · THE STATS · WHY IT'S WORTH SOLVING

Getting seen is the new hard part.

1 in 3

new companies in 2026 has just one founder. AI made building cheap and fast.

~1,500

visits from a top-5 Product Hunt launch today. It used to be 15,000.

10 hrs/wk

spent posting, messaging and scrolling Reddit — for a handful of real conversations.

#1

founder complaint online is not AI or features. It is distribution.

Launch → silence. Founders build for months, launch, and nobody notices. Five signups. Three are family. Ten years ago the hard part was building. Today the hard part is getting people to see it.

Sources: Solo Founder Playbook 2026, FundnAI, Before Takeoff, r/buildinpublic

Founders told us this to our face.

"All these tools are separate ingredients in a kitchen. Braino is the chef — one finished dish, no juggling apps."

— Prithvi, founder of our Hyderabad startup community · ready to pay ₹3K/mo

"Distribution is my biggest bottleneck. I can't figure out positioning. I would actually buy this."

— Founder, CareKin · ready to pay ₹2K/mo

"Scripts are the headache. Making videos is easy — knowing what to say isn't."

— Founder, LazyTyper

"Reddit is where the research is. Automating content there is worth paying for by itself."

— Founder, Stazey · ready to pay ₹1.5-3K/mo

8 / 8

said distribution is their biggest unsolved problem. 3 said "I would buy this" on the spot.

0 / 8

pay for a single distribution tool. No system at all — Braino becomes the first one they ever use.

STATUS QUO · THREE BAD OPTIONS TODAY

Do it by hand

10 hrs/week of posting and scrolling. Eats the time they need for building.

Build their own hacks

Personal scripts and bots. They break, nobody maintains them. A patch, not a system.

Hire experts

Consultants charge $700-1,000/hour (₹60-83K). Only funded companies can afford it.

PROBLEM SIZE · TAM / SAM / SOM

Big market. Even bigger timing.

$2.5B

TAM — solo founders and small teams who must market themselves

$500M

SAM — the part we can serve: 1-2 person teams, India + English-speaking world

$50-100M

SOM — realistic first target: 10-15K founders paying us

And where people discover products is changing right now:

37%

of product searches now start in ChatGPT or Perplexity — not Google

9x

better conversion when ChatGPT recommends you vs a Google result

82%

of brands do nothing about this. They are invisible in AI answers.

Whoever helps founders get seen during this shift wins the founder.

PERSONA · WHO IS OUR CUSTOMER & WHY THEY'RE RIGHT

The founder who built something — and nobody saw it.

MAIN CUSTOMER

The Solo Builder

Builds fast with AI. Then hits the wall: nobody sees the product.

Pays for zero marketing tools today (0 of our 8 interviews).

Biggest pain is content: what to write, what to post, staying active on Reddit.

Wants AI to draft everything — but insists on approving before it goes public.

Will pay ₹1,500-3,000 a month. Wants ONE app, not five.

SECOND CUSTOMER

The Marketing-Savvy Founder

Knows marketing well — but drowning in the daily work of it.

Told us AI-written outreach would save 40-50% of his effort.

Already sees that people ask ChatGPT more than Google.

Will pay $200+ a month — cheap next to $700-1,000/hr consultants.

Why they're right: they feel this pain every week, three already said "I'd buy," and we can reach them for free — through Mesa (120 founders), our Hyderabad network, and free Braino users.

POSITIONING · THE SOLUTION IN ONE PICTURE

What is Braino? One AI. Two forms.

You talk → Braino works → You approve → **The world sees you**

FORM 1 · FOR EVERYONE · FREE

Braino Companion

Your everyday AI. It reads pages with you, records your meetings, automates boring work — and learns how you write and what you're building.

Live today: v4.4.8 — Chrome extension

FORM 2 · FOR FOUNDERS · PAID

Braino Foundry

The same companion becomes your co-founder. Two jobs:

Braino Code — builds your product with you.

Braino Distra — gets your product seen.

Deep dive on both → next two slides

Not another tool you have to learn. A co-founder that does the work — and everyone's free companion is where our founders come from.

DEEP DIVE 1 OF 2 · BRAINO FOUNDRY

Braino Code: builds your product with you.

1 · You describe your idea

In plain words. No specs, no jargon. “I want an app that helps gyms keep members.”

2 · Braino asks co-founder questions

Who is it for? What must it do? What do we skip? — the thinking most solo founders have nobody to do with.

3 · Braino builds it

A real, working product you can open and show people — in one sitting.

Different from tools like Lovable: they do what you tell them. Braino first helps you figure out WHAT to build — then builds it.

And the moment your product exists, you hit the wall from slide 2: nobody sees it. That’s job 2 →

[Add product screenshot / demo GIF on this slide before sending]

Braino Distra: three engines that get you seen.

Engine 1

Content

Writes posts and scripts in YOUR voice and posts them across Reddit, LinkedIn, X and Instagram — every week, without you staring at a blank page.

From research: content was pain #1. "Scripts are the headache."

Engine 2

Optics

Every week, checks whether ChatGPT and Perplexity recommend YOU when buyers ask — and publishes fixes so you rank higher. Includes basic SEO tracking.

From research: all 8 founders wanted this. An AEO agency founder confirmed it's weekly work.

Engine 3

Outreach

You say who you want to meet. Braino researches each person and drafts a personal message for every one. You approve, it sends, it follows up.

From research: a marketing expert said this saves 40-50% of his effort.

ONE RULE ABOVE ALL: nothing goes public without your approval. Every draft lands in one inbox — you tap yes or no. All 8 founders demanded this.

Why this is 10x better: today a founder needs 5 different tools plus 10 hours of their own week — and still stays invisible. Braino is one companion that does the whole job, for less than the price of any single tool.

BUSINESS MODEL & TRACTION · HOW WE MAKE MONEY

Free companion. Paid co-founder.

WHAT	PRICE	WHERE THE NUMBER COMES FROM
Braino Companion	Free	Builds the user base. Some users become founders — our future Foundry customers.
Braino Foundry · Distra subscription	₹1,500-3,000/mo in India at launch. Later, abroad: $100+/mo. Marketing-heavy founders: $200+/mo.	Every number was stated by a founder we interviewed: ₹2K (Sidhant, CareKin), ₹1.5-3K (Stazey founder), ₹3K (Prithvi — founder of our Hyderabad startup community, where I've been a member for 2 years), ₹1.5-2K (Vihar, Dinebees), $100+ (the LazyTyper founder's estimate), $200 (the GTM expert).
Braino Foundry · Code	Planned: credit-based you buy credits, building uses them.	Pricing not final. Credits let a founder start small and pay for exactly what they build. We'll lock the numbers with our first Foundry clients.
Done-for-you service we run your distribution ourselves	First month free → then ₹25-50K/mo (our target)	Vihar (Dinebees) signed up on the spot for the free month. What we learn doing it by hand becomes the product.

How it snowballs: free users → some become founders → Code builds their product → Distra gets it seen → their success brings more users. **Braino markets Braino.**

TODAY: v4.4.8 live · 60/60 demo viewers asked to try it · 3 founders said "I'd buy" · 1 service client signed · 120 Mesa founders to sell to

GO-TO-MARKET · HOW WE REACH CUSTOMERS

We do it by hand first. Then we turn it into software.

STEP 1 · NOW

First clients — by hand

Dinebees already signed — from our Hyderabad startup community. We personally run distribution for 3-5 founders and write down every task we repeat.

STEP 2 · NEXT

Mesa (120 founders) + Hyderabad (50 friends, 700 network)

We pitch both circles. Any task repeated for 3+ founders becomes a Braino feature — the service writes the product for us.

STEP 3 · THEN

Free users everywhere

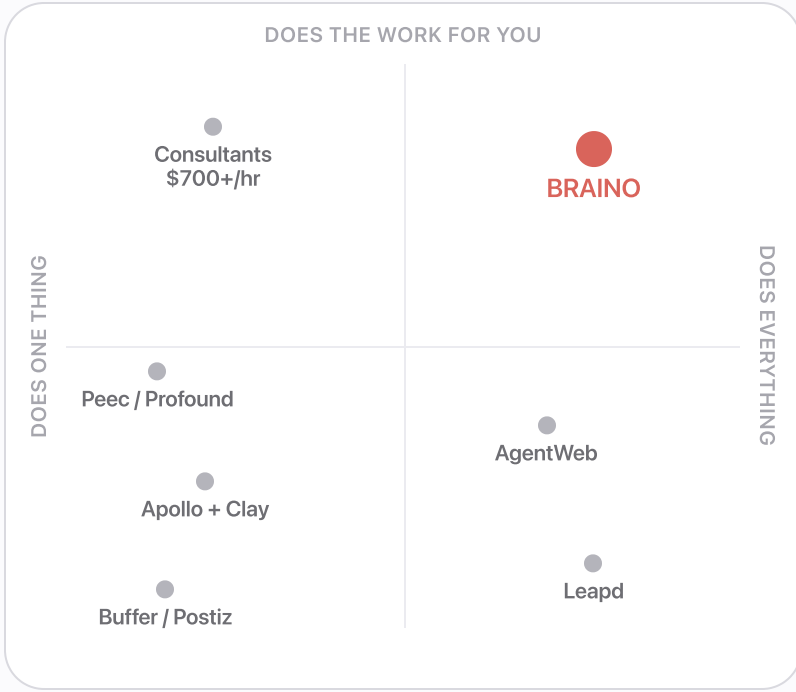

Free Braino users who become founders upgrade to Foundry. And we launch Braino using Braino — the product is its own proof.

Why by hand first? Because 0 of 8 founders pay for tools today. So we sell the result first — "we'll get you seen" — and let real work tell us exactly what to build.

COMPETITION · TABLE + 2×2

Everyone sells a tool. Nobody does the work.

	WRITES CONTENT	AI VISIBILITY	OUTREACH	DOES IT FOR YOU	PRICE
Lovable (builds code)	✗	✗	✗	✗	$25+/mo
Leapd	✓	✓	✓	✗	$299-999/mo
AgentWeb	✓	partly	partly	✗	$299/mo
Apollo + Clay	✗	✗	✓✓	✗	$50-100/mo
Peec / Profound	✗	measures only	✗	✗	$99-399/mo
Consultants	✓	some	✓	✓ (human)	$700-1,000/HR
BRAINO	**✓ your voice**	**✓ checks + fixes**	**✓ approved**	**✓ AI + service**	**₹1,500-3,000/mo**

Everyone is on the left or the bottom. We're alone up here — and these tools are built for marketers with budgets. Our customer pays for nothing today, and told us exactly what they WOULD pay for.

Let's make being seen the easy part.

A companion for everyone. A co-founder for founders.
