Braino

Building got easy. Being seen did not.

Eight founders sat down with me in one night. Eight said distribution was the thing killing them. Zero pay a rupee to fix it. That gap is the company.

What problem are you solving?

Anyone can build now. Almost nobody gets seen.

01 · BUILDING STOPPED BEING HARD

90%

Cheaper to build with AI, and 60% faster to a working MVP. One in three new companies in 2026 is a single person. Ten times the products, the same number of people looking.

02 · THE LAUNCH CHANNELS DIED

1,500

Visits from a Product Hunt top five finish today. It used to be 15,000. You ship, you post once, and the silence is total.

03 · SO THE BUILDER BECOMES THE MARKETER

2 hrs / day

Six months on Reddit for two or three usable openings a week. Eight to twelve hours a week, taken from the only hours they had for building.

WHY IT IS WORTH SOLVING

A VC read a year of founder forums looking for the recurring theme. It was not AI. It was not features. It was distribution.

These founders are not bad at it either. Value-first posting works, at roughly ten times the engagement of a promotional post. It just eats the week. And discovery is moving into AI answers, where 82% of brands are invisible by default, so the problem is getting bigger while nobody is selling them a way out. **Distribution should be as easy as vibe coding.**

Primary research · 24-hour open house · 15 hours, 25 conversations, 8 structured interviews

Eight founders. Eight said the same thing.

FOUNDER	WHAT THEY SAID	PAIN #1	PAYS FOR	WOULD PAY
Shah Rukh Comic universe · 5y GTM	"Distribution is the central nervous system of any founder's journey." AI outreach saves 40 to 50% of the manpower.	Outbound	Nothing	~$200 / mo
Sai Karan LazyTyper	"Scripts are the headache." Videos are easy, writing is not. Built his own X bot rather than pay for one.	Content	Nothing · own bot	"$100+ is normal"
Vihar Dinebees · 10K downloads	Cannot find the right creators. "In India, public posting needs human review." Max one or two subscriptions, ever.	Content	Nothing	₹1.5 to 2K · signed
Sidhant CareKin	Distribution and positioning are the bottleneck. Learned these tools existed during the interview. "I would actually buy it."	Positioning	Nothing	₹2K · stated buyer
Stazey Airbnb alternative	Loved the content engine. Automating Reddit and LinkedIn posting "alone is worth it."	Content	Nothing	₹1.5 to 3K
Vikas XEO Rank · AEO agency	Expert validation: AI visibility is monitor-first and weekly, never a one-time fix. Add SEO tracking to the optics engine.	Domain expert	Runs the agency	—
Prithvi Community founder	"Tools are separate ingredients in a kitchen. Braino is the chef, one dish, no juggling apps." Human in the loop is a must.	Tool juggling	Knew them, never used	₹3K / mo
Eighth founder Verbal notes	Same pattern. Distribution pain, no tools paid for, content first.	Distribution	Nothing	—

8 / 8
Name distribution as the core unsolved pain

0 / 8
Pay for any distribution tool at all

8 / 8
Want AI visibility once it is explained

8 / 8
Demand an approval gate before anything posts

3
Stated buyers. India band ₹1,500 to ₹3,000

Status quo · how founders solve it today

Three ways to do it now. All three fail the same founder.

Grind it by hand

Post, scroll, comment, DM, repeat. The documented case: six months, two hours a day on Reddit, for two or three usable openings a week.

Gap: it costs the exact week they needed to build

Build your own

Sai built a bot called Lara to watch X for him rather than pay for a tool. One channel, one purpose, no maintenance, nobody to call.

Gap: duct tape, and it only ever covers one channel

Hire a human

A GTM consultant was $60 to $70 an hour two years ago. The same person now quotes $700 to $1,000, with a two week lag and no product context.

Gap: priced for companies with revenue. That is not this founder

THE GAP THAT CHANGED THE PLAN

Zero of eight pay for a single distribution tool. There is nothing to switch them from.

Every product on the market is sold to a marketer with a budget. Nobody sells to the pre-revenue founder doing it alone, so Braino is not a replacement, it is the first system they will ever own. Slower to win. Far harder to lose.

How big is the opportunity? TAM, SAM and SOM.

A big market to sit in. A small, real slice to win.

TAM

$126B

Everyone paying for an AI assistant, plus everyone paying for marketing and distribution software, worldwide.

SAM

$12B

About 20M English speaking people building software with AI who are not professional engineers, at $600 a year.

SOM · YEAR THREE

$11M

10,000 founders on Foundry at $50 a month, plus 30,000 Companion Pro at $15. Nine hundredths of one percent of the serviceable market, counted bottom up.

And the ground is moving underneath it. Discovery is leaving the search box, which is what turns visibility from a project into a subscription:

37%

Of product discovery now starts inside an AI answer, not a search result. Profound.

9x

ChatGPT referrals convert at 14 to 16%. Google organic converts at 1.8%. Omnibound.

82%

Of brands have no AI visibility strategy at all. Invisible by default. Erlin.

23% / mo

Citation churn. Only 30% of brands survive answer to answer. AirOps.

Sources: Solo Founder Playbook, FundnAI, Before Takeoff, VibeCom, Profound, Omnibound, Erlin, AirOps, Semrush (2026). Reddit is about 10% of all AI citations while brand sites are 5 to 10%, so one good Reddit post is both the presence and the visibility fix.

Who is your customer? Clearly define your ICP.

The founder who already shipped it, and heard nothing back.

THE PROFILE

WHO	**Solo or two-person founder.** Technical enough to ship. Not a marketer, and refuses to become one.
WHERE	**India first.** Hyderabad, then my own cohort, then English speaking builders anywhere.
STAGE	Product is live and pre-revenue. Built with AI in weeks, not quarters.
PAIN ONE	**Content.** Scripts, ghostwriting, a Reddit presence, finding creators.
BUDGET	**₹1,500 to ₹3,000 a month.** One or two subscriptions, ever. Three of eight said yes at this band.
THE MOMENT	**They launched. They posted once. Nothing happened.**

WHY THEY ARE THE RIGHT CUSTOMER

1. **The wound reopens every week.** They ship, nobody sees it, again. Weekly pain is a subscription. Annual pain is not.
2. **The money is already leaving, on the wrong half.** Every tool they own helps them build. Not one helps them get seen.
3. **They are sitting in public describing this.** On Reddit and X, in the present tense. The research engine is aimed at them by design.
4. **Vibe coding manufactures more of them daily.** The market grows with the exact thing causing the problem.

The free Companion is the audience above both: anyone on a screen all day, almost free to reach, and where the founders already are. **Second customer, the GTM-aware founder at around $200 a month,** who prices Braino against a consultant rather than against a tool.

What is your product or service?

Not another tool. A co-founder who does the work.

"Tools are separate ingredients in a kitchen. Braino is the chef. One dish, no juggling apps." One companion, spoken to out loud. What changes between the two is how much of the company he is allowed to run.

FREE · FOR EVERYONE

Braino Companion

Every other AI lives in a tab, with no eyes on your screen and no hands on your machine. He does not.

- Sees the page you are on. No pasting, no describing it
- One memory across the browser, the Mac and the web
- Talks back out loud, and does the thing instead of explaining it
- Free, or ₹1,499 a month with no ceiling

PAID · FOR FOUNDERS

Braino Foundry

The Companion, plus the two jobs that decide whether a company happens. This is the service being bought.

- **Braino Code.** Say the feature out loud, he builds it
- **Distra.** Writes in your voice and posts where your buyers already are
- Checks weekly whether AI answers name you, then ships the fix as content
- Nothing leaves without your tap. ₹2,999, or $49 to $99

Three engines. One approval inbox over all of them.

Engine 01 — RUNNING

Content

Writes in your tone from what you actually shipped, then fits it to Reddit, LinkedIn, X and Instagram. A listener watches your keywords and hands it the threads worth joining, so it never starts from a blank page.

7 / 8 named content as pain number one. Publishing on X and Reddit today

Engine 02 — WEEK 3 TO 4

Optics · AEO and SEO

Asks your buyers' questions to the AI every week, checks whether the answer names you, scores it, and ships the fix straight back through Content.

8 / 8 wanted it once explained. Citations churn 23% a month, so it is never done once

Engine 03 — WEEK 5 TO 6

Outbound

Researches the target, drafts the one-to-one message, tracks the reply. Drafts only. It has never sent anything on its own and it never will.

4 / 8 wanted it. Shah Rukh puts the saving at 40 to 50% of the manpower

THE SPINE, AND THE THING WE DID NOT BUILD

One inbox. Voice in, tap out. Nothing posts anywhere without the founder approving it.

Eight of eight demanded that gate before they demanded a single feature, so it ships with v1 rather than after it. Inbound calling is not on this slide because zero of eight asked for it, and a roadmap that only ever adds is a roadmap nobody stress-tested.

How will you make money?

Every price here came out of somebody's mouth.

TIER	WHO IT IS FOR	PRICE	WHO SAID THE NUMBER
Free	Everyone	₹0 Capped by session	The funnel, not a trial with a clock on it. This is where the founders already are
Companion Pro	Daily users, and the India starter	₹1,499 Per month	Vihar's ₹1.5 to 2K ceiling. Sai's $10 to 15. The AI subscription they already pay for
Braino Foundry India	Pre-revenue founders	₹2,999 Per month	Prithvi ₹3K. Stazey ₹1.5 to 3K. Sidhant ₹2K and "I would actually buy it"
Braino Foundry Global Pro	Solo founders outside India	$49 to $99 Per month	"A normal founder would pay $100+" · Sai Karan
GTM tier	Revenue stage	$200+ Per month	Shah Rukh's stated ceiling, against consultants now charging $700 to $1,000 an hour
Run it for you	First clients, then anyone	Free → ₹25 to 50K Per month	Dinebees signed the free month. YC 2026: sell the service, then productize it

SIGNED

Dinebees · 10K downloads

Hyderabad. A free month of me running his distribution by hand, on the exact wiring in this deck.

DEMAND

25 founders, all of them

Every founder shown Braino asked when they could have it. Not one asked what it was for.

IN BUILD

4 surfaces, private testing

Mac, browser, web and voice. Content publishes on X and Reddit today. The site is a waitlist, honestly.

How do you reach them?

Service first. Productize what repeats.

Hyderabad, now
Dinebees signed a free month of hand-run distribution. Fifty founder friends behind him, inside a 700 strong ecosystem

→

My own cohort
120 founders in the same building. Three to five more on the same terms, every repeated task written down

→

The free Companion
Everyday users become founders become Foundry customers. The funnel compounds without a launch

	Q4 2026	Q1 2027	Q2 2027	Q3 2027
Product	Approval spine live. Content engine in alpha, running for real clients	Content GA. Optics in beta, weekly reports going out	Outbound, gated. One dashboard across all three engines	Voice orchestration. Braino Code and Distra on one memory
Distribution	3 to 5 hand-run clients. 25+ founder interviews banked	25 paying founders on the India tier. Hyderabad wedge open	100 founders. Public launch, run on our own engines	300 founders. Global Pro live. First GTM tier clients
Revenue	₹0 to 50K MRR Service only	₹1 to 2L MRR	$5 to 10K MRR	$25K+ MRR

Any task I repeat for three clients becomes a Braino feature. The service is not a detour from the product, it is how the product gets specified by people who have never bought one. **And Braino distributes Braino:** our own launch is the first case study.

How is it 10x better than the alternatives available today?

Everyone sells half the job. The empty half is the company.

PLAYER	CONTENT	AI VISIBILITY	OUTBOUND	DONE FOR YOU	PRICE
Lovable	—	—	—	—	$25+
Buffer / Postiz	Schedule	—	—	—	$15 to 49
Apollo + Clay	—	—	Strong	—	$50 to 100
Peec / Profound	—	Measures	—	—	$99 to 399
AgentWeb	Yes	Partial	Partial	—	$299
Leapd	Yes	Yes	Yes	—	$299 to 999
GTM consultants	Yes	Some	Yes	Yes · human	$700 to 1K / hr
Braino Foundry	Yes	Fixes weekly	Gated	Agent + service	₹1.5K to $200

Everything in software sits in **you do the work.** The only done-for-you option is a human at $700 an hour. **Full-stack, agent-run and founder-priced is an empty quadrant.** The 10x is not a smarter model, since everyone rents the same ones. It is that one thing spans building and distribution: what watched you ship the feature already knows what Tuesday's post is about.

The ask

A companion for everyone.
A co-founder for founders.

Founders do not need another tool. They own none. They need one companion that writes in their voice, keeps them named where people now ask, and never posts without a tap. The first client's week starts Monday.
